

CURRICULUM VITAE

Khalid Ayomide Oyekunle

Software Developer · ASP.NET Core · Web & Desktop Systems

Oyekunlekhalid0122@gmail.com | 09061421795 (WhatsApp) / 09115460048

GitHub: github.com/khaleed-x | **LinkedIn:** linkedin.com/in/khalid-ayomide-54944230b

PROFILE

Backend-focused .NET developer with hands-on experience building scalable web and desktop applications using ASP.NET Core (MVC & Web API). Experienced in designing structured application architecture, implementing background processing, and integrating real-world payment systems. Transitioned from Windows Forms to modern web development through self-driven learning and practical project execution.

EDUCATION

National Diploma (ND) — Computer Science | *The Polytechnic Ibadan* · Completed 2025

Higher National Diploma (HND) — Computer Science · *The Polytechnic Ibadan* · In Progress

INDUSTRIAL TRAINING

Software Development Intern | *SoftcodTechNG, Ibadan*

2024

- Completed structured training covering C# WinForms development, PHP web development, and graphic design
- Focused intensively on C# and left the programme as a proficient Windows Forms developer
- Later leveraged this foundation to independently transition into ASP.NET Core MVC, WebApi development — producing a production-standard application
- Awarded SIWES Industrial Training Certificate upon completion

LEADERSHIP & ACTIVITIES

Software Director II | *NACOS TPi Chapter (Nigerian Association of Computing Students)*

2024/2025

- Held a technical leadership position within the student chapter, contributing to software-focused initiatives and community programmes
- Awarded Certificate of Office upon completion

PROJECTS

AurHER — E-commerce Platform. (aurher.onrender.com)

- Full-stack web application built with ASP.NET Core MVC (.NET 10), PostgreSQL, and Entity Framework Core
- Features Paystack payment integration, background job workers, automated email/SMS notifications (MailKit, Termii), and server-side image compression
- Implements strict Controller → Service → Repository architecture, cookie-based admin authentication, session-based guest cart, and a complete admin dashboard with real-time analytics using charts

- Guest-only checkout design targeting the Nigerian market — no user registration required

VaultNG — Fintech Platform *(In Progress)*

- ASP.NET Core Web API backend with React frontend providing a unified financial platform for individuals and businesses
- Core features: wallet funding, instant money transfers, goal-based savings, fixed-return investments, and business payment collection — all on real Nigerian payment infrastructure
- Solves the fragmentation problem of using multiple apps (Kuda, PiggyVest, Paystack, etc.) by consolidating everything into one platform
-

Velora — Distributed Background Job Processing Platform *(In Progress)*

- Open-source, language-agnostic distributed background job platform similar to Hangfire or Celery
- Designed to support workers written in any programming language through a shared broker and unified API
- Exploring queue-based architecture and worker orchestration
- Collaborative open-source project.

Desktop & Console Applications (C# WinForms)

- Car Rental Service Management System
- Student Final Year Clearance Administration System
- Student Course Management System
- Student Attendance System using Barcode Verification
- Airtel USSD Simulator — console-based airtime management tool mimicking Airtel USSD flow

TECHNICAL SKILLS

Languages	C#, JS/TS
Frameworks	ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, React.
Databases	PostgreSQL, SQL Server
Tools	Git, GitHub, VS Code
Concepts	Repository/Service Pattern, MVC, REST APIs, Background Services, Cookie Auth, Session Management

CERTIFICATIONS

SIWES Industrial Training Certificate · SoftcodTechNG · 2024

ND In Computer Science · The Polytechnic Ibadan · 2025

Certificate Of Leadership · National Association of Computing Students (NACOS) TPI Chapter · 2025
